Issue: Issuance of Wholesale Seafood Truck Permits

No: SF-06

Prior to the issuance of a Wholesale Seafood Truck Permit by the Massachusetts Division of Marine Fisheries (DMF), the Massachusetts Department of Public Health (DPH) shall inspect the vehicle to ensure compliance with applicable rules, regulations, and policies.

The approval of any vehicle, whether owned or leased by the applicant, is valid for only that specific vehicle. Any additional vehicles, or replacement vehicles, utilized for the shipment of seafood under the applicants permit must be inspected and approved by the Department.

The use of one dealer's vehicle by another dealer is strictly prohibited unless pre-approved by DMF and DPH.
